

YOKIS.

Your work, made easy.

Do you still run your company with paper, Excel and phone calls?

Then you know these problems.

You do not know who really came to work.

Workers sign a paper list. Some workers sign for friends who did not come. At the end of the month, you pay for days that nobody worked.

You do not know what is in your store.

Things come in and go out every day, but nobody writes it down well. You learn that something is finished on the day you need it.

You cannot follow your money.

The customers who did not pay are in a notebook. Receipts are lost. You know if you made money only at the end of the year.

You must call many people to know one thing.

Each person tells you a different story. When you are away from the office, you do not know what happened today.

Yokis makes one system only for your company.

We come to you and learn how you work. Then we make a system that fits your work. Your workers use it on their phones. You see your whole company on one page.

As simple as using Telegram.

Call us: **+251 993 399 972**

jonahbirhanu@gmail.com

What we make for you

- 1 **Attendance.** You see who came to work, who is late and who did not come.
- 2 **Employee performance.** You see with numbers who does good work and who needs help.
- 3 **Salary.** The system counts the pay and the extra hours for you in minutes.
- 4 **Employee files.** All the papers of each worker are in one safe place.
- 5 **Store.** You know what you have and what is almost finished.
- 6 **Sales and customers.** You see what you sold and which customers have not paid.
- 7 **Buying.** You see who asked, who said yes and how much was paid.
- 8 **Money.** You see the money that comes in and goes out every day.
- 9 **Jobs and tasks.** You see who does each job and which job is late.
- 10 **Daily reports.** Workers fill a short form and the boss gets one clean report.
- 11 **Yes or no from the boss.** The boss says yes or no on the phone, from any place.
- 12 **Owner's page.** You see your whole company on one page.

Inside every system

Messaging

Your team sends work messages inside the system. It is like Telegram, but only for work. No message is lost.

AI helper

A worker asks a question in simple words. The AI tells the worker what to do and shows the right page. It works day and night.

How we work

1. **We talk.** We come and listen to your problems.
2. **We plan.** We show you what we will make and the price.
3. **We make it.** You look at it and tell us what to change.
4. **We teach.** We teach your workers to use it.
5. **We help.** After you start, we are there for you.

Why Yokis

- We make it for you, not for everybody.
- It works for any kind of company.
- You can start small and add more later.
- It is as simple as using Telegram.

Call us. The first meeting is free.
